DRIVE FOR CATHOLIC CHARITIES FUND MAKING GOOD PROGRESS

Local Committees Fell Encouraged Over Support Given

CAMPAIGN ENDS MONDAY EV'G.

The drive for the Catholic Charities Fund in the Pittsburg district, of which Charleroi is a part, will end Monday evening next at which time it is hoped to have the $500,000 which is the aim of the general committee to accomplish.

The various local committees, which are now at work in every community from North Charleroi to Allenport inclusive, have been very active during the week, and have been making most satisfactory progress. In Charleroi the contributions are approaching the $2,000 mark, and the committees hope to make it at least $3,000 before Monday evening. Some very generous [illegible] been made by the business men, and one contributor gave $500, the largest amount received from any one individual. The local committees have not yet completed their work, but expect to get over all of the ground before the expiration of the time limit on the campaign.

The women's committee is making a house to house canvas, and are meeting with encouraging results. Wednesday evening this committee had over $600 to its credit, and it is their anticipation to swell this amount several hundred dollars before the campaign is over.

In the outlying districts the larger part of the work will be done today and tomorrow, when it is hoped to raise several hundred dollars for the fund, which will be used for charitable purposes during the next five years.

Reports from other districts in the diocese are of a very encouraging nature. Down in Donora, where it had been anticipated to raise $2,500, the returns after a very short campaign, showed over $4,000, and these figures will be exceeded when the campaign ends Monday evening.

BELLE VERNON PASTOR RESIGNS PASTORATE

Rev. Thomas Wood, who has been the pastor of the First Christian church of Belle Vernon for the past seven months has tendered his resignation and will preach his farewell sermon Sunday evening. He has accepted a call to Braddock, and will take up his work there the first Sunday in November.

MILL WORKERS CHASED HOME

Considerable excitement was caused on Fallowfield avenue, near Seventh street, last evening about 6 o'clock, when two young men, Jules Judex and William Sonkele both of whom are employed at the Pittsburg Steel Products plant, were chased by a number of men said to be strikers. The young men were on their way home, and it is said they were intercepted near Thirteenth street, where the chase began. As they sped up street a man following them at a little distance, called out to them to stop, as they "had shot a man." However, this report could not be verified, and the police knew nothing of any shooting that is alleged to have been done. The two young men finally reached the Judex home on Fallowfield avenue, very much scared by the incident, but in no way given any bodily injury. It is said Sonkele returned to work this morning, but Judex remained at home. No arrests were made.

MOTHER JONES AN AVOWED BOLSHEVIK

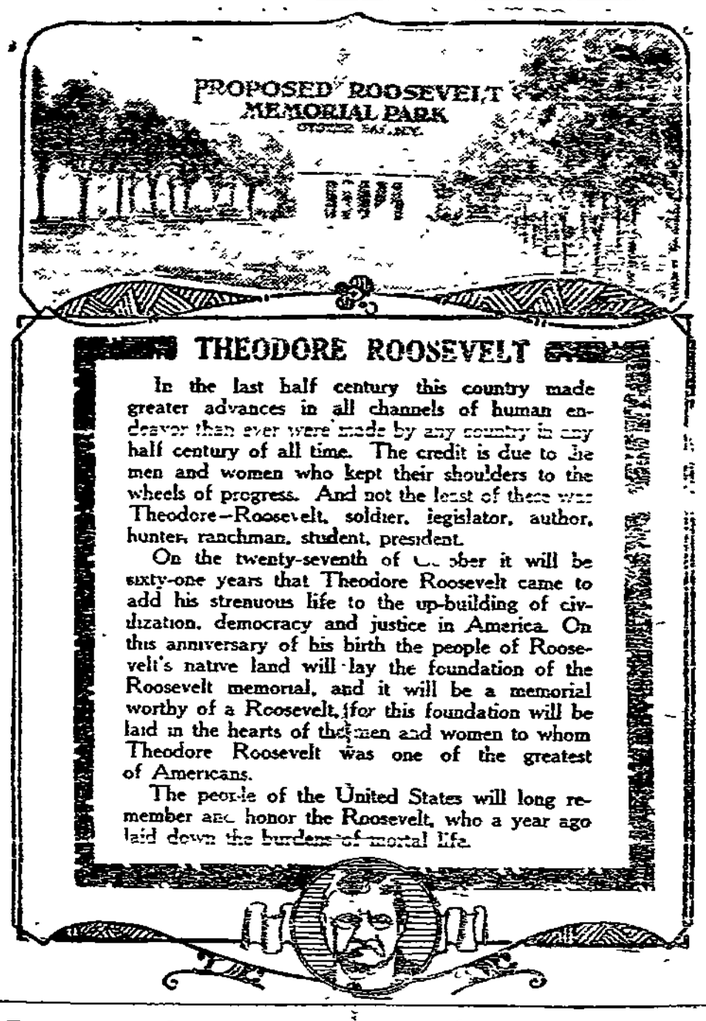
Mother Jones, who appeared at a mass meeting of strikers in Charleroi a few weeks ago, appeared in the Calumet district near Chicago, on Friday, and made her first public appeal for violence, declaring herself unequivocally to be a Bolshevik. She stirred to frenzy some 1,200 strikers and their wives in Turner Hall at Gary, following the refusal of the authorities to permit her to speak in East Side Park in Chicago.

CARNEGIE MILL TO START ON MONDAY

The mill of the Carnegie Steel company at Monessen will resume operations on Monday next, thus placing the last of the plants in that town which have been idle during the present strike on the active list. Additional men are said to have reported for work in the other plants, and everything is moving off quietly in the town.

DAYLIGHT SAVING ENDS TOMORROW

Watch your clock. The Daylight Saving Law becomes inoperative Sunnday, October 26, and in order to keep the right time it will be necessary for you to set your clock or watch back one hour tonight before retiring, in order to keep in touch with the balance of the community. At 2 o'clock tomorrow morning all clocks along the Pennsylvania Railroad system will be put back one hour to indicate one o'clock, and the slow time will prevail in the future. In order to be in harmony with this change it will be necessary for the public in general to follow the railroads in setting their timepieces.



THEODORE ROOSEVELT

In the last half century this country made greater advances in all channels of human endeavor than ever were made by any country in any half century of all time. The credit is due to the men and women who kept their shoulders to the wheels of progress. And not the least of these was Theodore—Roosevelt, soldier, legislator, author, hunter, ranchman, student, president.

On the twenty-seventh of October it will be sixty-one years that Theodore Roosevelt came to add his strenuous life to the up-building of civilization, democracy and justice in America. On this anniversary of his birth the people of Roosevelt's native land will lay the foundation of the Roosevelt memorial, and it will be a memorial worthy of a Roosevelt, for this foundation will be laid in the hearts of the men and women to whom Theodore Roosevelt was one of the greatest of Americans.

The people of the United States will long remember and honor the Roosevelt, who a year ago laid down the burdens of mortal life.

United States Troops May Be Sent to Pennsylvania

A report reached Donora today that two battalions of United States Infantry, of the famous First Division of the American Expeditionary Forces, now stationed at Camp Zachary of Taylor, Kentucky, had entrained for Pennsylvania this morning. It is further reported that a request will go forward to Secretary of War Baker some time today to have a part of these troops stationed in this section of the valley until such time as the present unrest is abated.

The request which will go forward to the Secretary of War, it is said, will call attention to the recent bomb explosions that have taken place in this vicinity within the past few days, and also to the two shooting affrays in which three men were wounded, all of whom are now in the hospital, and one of whom still remains in a very precarious condition. It is asserted that a large number of "Reds" and I. W. W.'s are located in this section of the valley, and that the presence of United States troops would assist materially in rounding them up.

The movement to have the troops come to this part of Pennsylvania appears to be a general one, in this district, which includes Monongahela, Donora, Monessen and Charleroi.

The battalion under orders to leave Camp Taylor will include machine gunners, and all of them prepared to take part in riot duty. The number of infantrymen in the battalion numbers 2,500.

REDEDICATION DATE DEFINITELY FIXED

The work of remodeling and redecorating on the Christian church is progressing so well that the date for the rededication has been definitely fixed for Sunday, November the ninth. The decorating of the auditorium and Sunday school rooms is completed and the new steam heating system is being installed. The work, when finished, will double the capacity of the church.

P. H. C. Masquerade

The fifth annual masquerade ball and reception under the auspices of Charleroi Circle 303 P. H. C. will be held in Mights auditorium October 27. Handsome prizes will be awarded. Tickets, gentlemen 75 cents, ladies 25 cents. Jenkins orchestra. 119-t4-*

EXTENSIVE IMPROVEMENTS ARE CONTEMPLATED IN LOCKS AND DAMS

Survey Under Way to Determine Cost of the Work

HEAVY INCREASE IN TRAFFIC

A preliminary survey to ascertain the cost of improvements on the Monongahela from Lock No. 1 to Lock No. 8, inclusive, is to be made at once. Authorization for this action was received on Thursday by Lieut-Col. H. B. Ferguson, District United States Engineer, from the chief of the department at Washington. The preliminary report was sent sometime ago by the local United States engineers to Washington, where it was approved. The act of Congress, granting the right to make the surveys, states that it shall be made within the state of Pennsylvania. So great has been the increase in commerce on the Monongahela that thesurvey will include estimates of the cost of additional lock at No. 4. Towing operations are heaviest in the third and fourth pools and it has become a necessity to have another lock to take proper care of the increasing amount of tonnage passing at these points on the river.

Estimates are also to be made on the cost of an additional lock at Lock No. 6 At Locks 7 and 8 the crambeers are to be enlarged and new dams are to be constructed. Lock No. 3 is to be lengthened to take care of an ever-increasing trade. Guide walls 1,000 feet long are to be built above and below Locks Nos. 1, 2 and 5 should the survey be approved. No delay is to be made in starting the preliminary survey, Col. Ferguson said on Thursday, members of the Pittsburg engineer's department having been given instructions to start work on Friday

More or less rumors have prevailed as to additional work to be done at Lock 4 in the way of lengthening the guide wall above the lock and constructing an additional one below, and it is possible these will be taken care of in the new order of things about to be carried out

BENTLEYVILLE TO HONOR MEN ON ARMISTICE DAY

Bentleyville is planning one of the biggest celebrations in her history, to take place on Armistice Day, November 11, when a monster event in honor of former service men of the community will beheld. Ellsworth and the surrounding townships will be invited to take part in the demonstration.

SPLENDID PROGRAM BY COLUMBIA QUARTETTE

The appearance at the high school auditorium, last evening of the Columbia Stellar Quartet, being the first attraction of four concerts to be given during the coming season in the Columbia Concert Series, was a pronounced success, from a musical point of view. The attendance was not in keeping with the excellence of the organization—at least, as far as numbers were concerned—and those not present missed an evening's rare pleasure.

The individual voices were of excellent quality, blending beautifully; while the ensemble was marked with minute attention to the details of expression, which, coupled with a clarity of articulation which was pleasing and refreshing, could not fail to conduce to finished performances. Indeed, it would be a somewhat difficult matter to find an organization on the concert stage of the present day which could surpass, in general excellence, the Columbia Stellar Quartet.

Of the concerted numbers on the program, possibly the most effectively rendered were Oley Speaks' "When the Boys Come Home," which was given an admirable interpretation; Metcalf's "Absent," Caro Roma's "Can't Yo' Heah Me Callin', Caroline," and Cook's "Swing Along," the latter a tuneful and characteristic negro melody, charmingly sung. Several recalls were demanded and complied with, the quartet, seemingly, being anxious and willing to please its auditors.

The solo offering by Reed Miller was keenly enjoyed. He sang "Ye People, Rend Your Hearts," and "If With All Your Hearts," being the well known recitation and aria from Mendelssohn's oratorio, "Elijah," with fine tonal quality, and in accordance with the true traditions of oratorio singing. Andreas Sarto, the baritone gave the "Prologue," from Leoncavallo's "I'Pagliacci," in splendid style, fully meriting the applause bestowed; while Schumann's stirring "Two Grenadiers" was sung very effectively by Tom Daniel Norman Arnold, whose voice, ar excellent counter tenor, is an ideal one for m ale quartet work, added much to the pleasure of the evening by his singing of a group of songs, of which, "When You and I Were Young, Maggie," was especially enjoyable

WHILE AMERICA DALLIES

While our workers strike, quarrel and idle, the nations of Europe are working like beavers, hustling after the world's trade and crowding our ports with their goods Of course this was to be expected of the neutrals who matured their plans before the fighters beat their swords into ploughshares; the figures for our imports from Norway, Sweden, Holland, Switzerland, Spain, etc., are not altogether surprising But it is astonishing to find that in August, the ninth month after the armistice, goods came to our ports in vast bulk not merely from England but from war-mangled France and from hoof-trampled Belgium. Even distracted Russia sent us goods in that month to the value of $2,700,000. Even Germany and Austria, though supposed to be in a state of utter collapse, sent us goods in August to the value of more than $550,000

Chastened by suffering and privation, Europe comprehends that the thing to do now is to buckle down to work and make the best of it Our own country, on the other hand, seems not to have suffered enough to achieve a chastened spirit We are still belligerent, internecine strife taking the place of foreign war Accusation and wrangling in the national forum—strikes and sullen idleneess in the populous centers Our soldiers did no looting in Europe, but we are now robbing each other—everybody a profiteer, more or less. And while all this goes from bad to worse other nations are bending their backs to work and to the task of capturing the world's trade. The situation must begin to right itself before a great while, however, for after all we are a level-headed people, devoted to sane methods and with a well earned reputation for intelligent industry

THE FARMER'S LONG HOURS

In behalf of the farmers who want to "strike" for shorter hours and continuing high prices, by cutting down their acreages of cultivation, it is urged that they toil and sweat many hours longer than other laborers; that they, their wives, sons and daughters work ten, twelve or fourteen hours with never a thought of overtime or extra pay; that if they did not do this in order to get the fields ploughed the crops cultivated and the harvests gathered within the limited time given them by the swiftly changing seasons they could not bring forth nature's wealth and feed and clothe the millions; that if they did not do this they would produce only the food, the wool and the cotton needed for themselves, and the public would go naked and starve—a public including the miners, shopmen and other city laborers who continue to strike for shorter hours as well as higher pay

All this is true—literally. But justice demands the recognition of an important difference between the farmer and the city laborer. The latter is a mere wage earner, while the farmer is a capitalist as well as a laborer, owning his plant and conducting his own business. Nor is he the only capitalist in business for himself who voluntarily and for gain works ten, twelve or fourteen hours a day. Thousands of others in many lines do this year after year Perhaps it is true that no one ought to work more than eight hours a day, but the average man in business for himself, who is unwilling to work more is not likely to succeed The former, indeed, is more fortunate than the average long-day-working employe because he enjoys a winter of comparative rest after the rush seasons are over

THE BOMBS

It would be a fine thing for the community if it were possible to discover who were the perpetrators of the bomb outrages, both Thursday and Friday mornings, that they might get their just deserts. Working under the cover of darkness however, these fiends were able to get away with their crime without being detected. They had no consideration for the innocent lives that were being endangered; all they appeared to care about was to do injury to some one, in order to gain some desired end. Such men, if ever apprehended should be given a sentence where their murderous proclivities would be held in check forever after We have noroom for such people in this community, and the sooner they are put under lock and key some place the better the people will be satisfied.

TWO PROPHECIES

Sir Ruer Haggard warns the nations of Europe and America that, unless they reform in the matter of "race suicide" or birth control, two centuries hence their depleted ranks will yield before the teeming and ever-increasing populations of the East. Though the distinguished Englishman calls attention to a great and threatening evil, the figures for the past century can hardly be said to support his prognostication According to the statisticians, during the past hundred years Asia increased its population about 140 per cent, Europe 144 per cent and the Americas nearly 700 per cent—immigration of course adding vastly to natural increase in the western hemisphere It is estimated that the natural increase of Europe and the Americas together was about 200 per cent to only 140 per cent for Asia. Apparently Asia's larger birth rate is more than offset by its much larger death rate, and so it will have to become more civilized, sanitary and profitably industrial before itcan overtake even a declining western world.

Sir Rider Haggard's prophecy calls to mind that of Sir William Crookes who more than twenty years ago predicted that starvation would face the world within a quarter of a century because the increase in wheat production could not keep pace with increase in population Wheat production has kept the pace and no doubt will continue to do so, that staple being substituted for less imperative crops in the distant time when all the land is under cultivation. There will continue to be a great supply of babies also. Of course as heretofore a selfish desire to shirk life's duties will cause society to die at the top, but society at and near the bottom will continue to be fruitful and send up thence the new leaders and rulers of men.

GERMANY GETTING BUSY

Among the articles shown at the exhibit of foreign goods which has been opened under the auspices of the Canadian Government in Ottawa, it is interesting to note the presence of a number that have been made in Germany.The collection includes a fine showing of mechanical and other toys, many of which are marked as German production. The appearance of such a display can hardly fail to cause mixed sentiments to arise in the thought of the onlooker. It is, of course, recognized that if Germany is to have any opportunity to pay the indemnity that has been levied against her, she must enter the world's markets,but she could have made a better choice of manufacturers for a trade exhibit than the old-time "Made-in-Germany" toys, because somehow there are bitter memories in connection with German toys and the war.

The Hour-Glass.

Instead of being obsolete the hour-glass in various forms is a present-day necessity. An authority points out that for such purposes as trimming, hardening and tempering heats in twist drill manufacture, where seconds or minutes must be gauged accurately, nothing serves like the hour-glass with the right amount of sand.

On Discarding the Old.

The great discard the old because it has been found insufficient or false, the small because it is old. While the former is influenced by reason, the latter is by disgust. Genius wants to do more than its predecessor; he who apes genius, merely something different.—Lessing.

Strange Animals.

At the foot of Mount Kowang, in North Manchuria, there live strange animals called "faru-nanban-kau." They are larger than ordinary apes and dig spacious caverns on the rocky sides of the hills. During the spring and summer they store up sufficient food for the winter.

Method of Faking Violins.

A claim which has been made for X-rays is that by exposing to their light a good modern violin it will acquire the characteristic tone of a genuine Strad, the action of the rays in a few hours ageing the wood by some 60 years.

New Zealand Lumber Vanishing.

At the present rate of increase in the consumption of native lumber in New Zealand it is estimated that the supply of standing timber will last not more than 30 years.

TAKES A NEW JOB WITH THE STATE

Ernest S. Whitehead, for several years residing at 89 Knox avenue, Knoxville, has accepted the assistant superintendency of the Western State Hospital for Insane, now under construction at Blaisville.

Mr. Whitehead first entered the service of the state in 1911, going to Harrisburg as commission clerk to Governor John K. Tener. In January, 1912, he came to Pittsburg as chief clerk to the State Board of Public Charities, which positions he resigns to take up state hospital work. Since January, 1916, Mr. Whitehead has also held the position of secretary and clerk to the building commission of the Western State Hospital, assisting in the construction of all temporary buildings.

Eight years service with the State Board of Charities, in the general supervision of all institutions in Pennsylvania, have especially qualified Mr. Whitehead for the duties he is about to assume.

Mr. Whitehead is the son of Mr. and Mrs. R. J. Whitehead, of Charleroi and was astudent in the Charleroi public schools and the Douglas Business College.

SAYS MEN WANTED STRIKE BENEFITS

The Donora Herald of Thursday said that one group of Donora strikers came to Charleroi Wednesday afternoon, announcing that they believed the paymaster would be there and that they would be paid strike benefits. However, they returned home later in the evening without having met the man with the money. It is said there has been considerable complaint among union men, who claim that strike leaders have from time to time promised them benefits, but so far they have not been realized. In Donora it is said that many of the strikers' wives have asked for work.

JEWISH WAR RELIEF AMOUNTS TO $5,679.70

The Jewish Relief War Fund for Charleroi and vicinity, which closed last week, realized a total of $5,679.70 in cash, with $500 in pledges yet to come in. Of this amount Lock Four gave $225 00 and Roscoe $359.12. The result is most satisfactory to the local committee in charge of the campaign, who wish to return thanks to the contributors for their generosity and goodwill in promoting the success of the undertaking. All of this money will be sent at once to the national headquarters, from where it will be distributed to the various counties for which it is intended.

START DOUBLE TURN MONDAY MORNING

One hundred additional men are reported to have returned to work at the American Steel and Wire plant in Donora Thursday morning. The force of workmen has been so augmented of late that the company expects to put rod mill No. 3 on double turn on Monday. No. 1 mill will run single turn for the present. The company is still adhering to the policy of permitting the men to return to their old jobs, but it is intimate that this policy may soon be dropped if any of the men show an indifferent attitude about coming back.

WILL CHANGE NAME OF BIG STEAMER

Work on rebuilding the steamer John A. Wood at the Elizabeth Marine Ways for the Standard Oil company is progressing rapidly. Workmen have started putting in new ribs, and it is said the new planking will be started within the next 15 days. The name of the steamer, it is said, will be changed and she will be rechristened the Baton Rouge. The steamer will ply the lower Mississippi towing oil barges for the Standard Oil.

LOST—Gray Bay Mare. Reward for return or information leading to return. George Nucci, Butcher, Dunlevy, Pa. 120-t2p

Lyman Ward, principal of the Southern Industrial Institute (for blacks) at Camp Hill, Ala., complains not only of "violence everywhere" but of "too much foolish talk, both North and South." He quotes Booker Washington as having said that "his wisest and best friend was the white man of the South." and goes on to declare his own belief that the average white man of the South is "just and kind to the average negro."

RELIEVES, TIRED ACHING MUSCLES

Buy a bottle of Sloan's Liniment and keep it handy for emergency

"IF I only had some Sloan's Liniment!" How often you've said that! And then when the rheumatic twinge subsided — after hours of suffering — you forgot it! Don't do it again—get a bottle *today* for possible use *tonight!* A sudden attack may come on — sciatica, lumbago, sore muscles, stiff joints, neuralgia, the pains and aches resulting from exposure. You'll soon relieve it with Sloan's, the liniment that *penetrates without rubbing.*

38 years' leadership. Clean, economical. Three sizes—35c., 70c., $1.40.

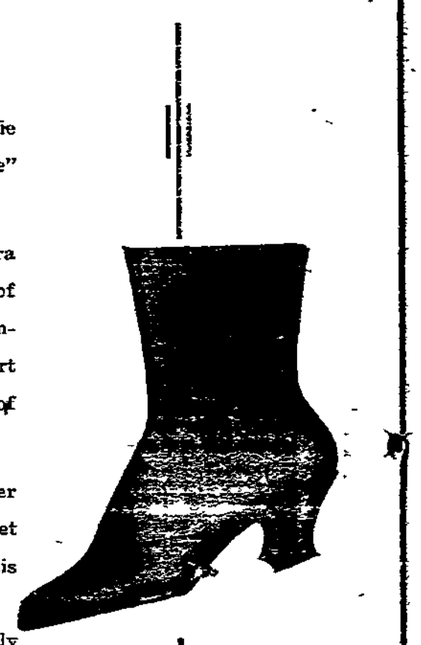
A Smart Shoe for the Stout Woman



There's a neat and select style to this popular "Out Size" model.

And there's plenty of extra width at the ankle and ball of the foot to allow the full formed woman plenty of comfort without the least sacrifice of style.

Stout women who have never been able to buy shoes or get an exact fitting should see this line.

The shoe with the specially constructed built-in steel arch support. The "Aunt Polly's Out Size."

SUICIDES AFTER A QUARREL WITH NEPHEW

When his nephew feigned that he had been killed during a quarrel and scuffle in which his revolver was discharged, Domineck Gedda, an Italian aged 29 and single, residing at Granville, near California, turned the weapon upon himself and fired a bullet into this body inflicting wounds which resulted in his death.

An investigation into Gedda's death was conducted on Thursday by Coroner Heffran. There were numerous witnesses who saw the man fire the bullet which ended his life, and also, the quarrel which led up to the act.

Gedda and John Alberta, his nephew, aged 19, and who recently returned from service, quarreled near their homes on Tuesday evening about 6:30 o'clock. Blows were exchanged and they grappled when Gedda pulled his revolver. In the scuffling it was discharged and the bullet burned the palm of Alberta's hand. Alberto dropped to the ground as though he had been hit. He continued to play "possum" and Gedda believing that he had really killed the youth walked about 50 feet away from the group of persons who had collected and made the successful attempt on his own life. He died Wednesday morning.

Dr Cook comes once more into the limelight with the announcement that he has made a million in oil in the Southwest. But the imaginative Doc is not content to be a mere plutocrat and still claims that his make-believe North Pole was the genuine article.

MONESSEN WINS OVER DONORA 6-0

The football game between the Monessen High and Donora High, at Donora, Friday afternoon, seems to have been a strenuous affair, due largely it is said to the incompetency of the referee. The score was six to nothing in favor of Monessen, the score being made in the first five minutes of play. During the game Monessen was penalized twelve times, while Donora drew a penalty but once. According to reports there was a great deal of argument during the game, and one Donora player was ejected from the game because of slugging. At the conclusion of the game the referee was escorted off the field between two State policemen. A large crowd of spectators was in attendance.

SPLENDID PROGRAM BY COLUMBIA QUARTETTE

Continued from page 1.

Owing to the fact that the quartet had to return to Pittsburg on the 9:16 train in order to be able to reach New York early this afternoon, the program was started fifteen minutes before the time announced. This change created some discussion, as it caused many patrons to miss several numbers. among them being some of the most enjoyable of the evening. This was of course, to be regretted; but no blame should be attached to Mr. Abe Levinson, under whose maagement the four concerts are given. Rather, he is deserving of the thanks of music lovers in this community for bringing these splendid attractions to Charleroi.

The second concert of the series will occur on November 17. when Oscar Seagle, the eminent American baritone, together with Barbara Maurel of the Boson Opera Company, will be heard in a joint program

The strike of longshoremen on Columbus day threatening to tie up the Alantic coast calls to mind the fact that, though the great Italian mariner was handicapped by the backward methods of the fifteenth century, he was at least secure from the wreck of his great plans by a union and a strike among his sailors.

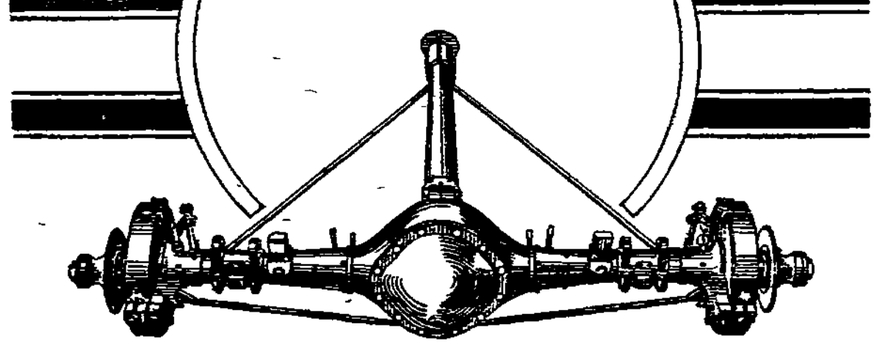
VALVE-IN-HEAD Buick MOTOR CARS



The Buick Built Rear Axle

Is another mechanical unit that bears the indelible Buick Stamp. Because of Buick patents that make it unique in design, manufacture and serviceability. No other automobile company can build an axle like it.

It is of the full floating type, insuring double factors of safety and the maximum of accessibility for adjustment or repair.

Housing, differential, pinions, shafts, universal joints and bearings are uniformly stronger than the demands of service can require, and the standards set by Buick designers are maintained in a factory equipped with the most modern machinery.

An elaborate inspection system keeps an infallible check on all heat treating and mechanical operations, and the factory organization is backed by experience covering nearly twenty years.
